---

* The mean population for the year is obtained as follows;—To the population at the end of the preceding year add four times the population on the 31st March of the year under review, twice the population on 30th June, four times the population on the 30th September, and the population on the 31st December, and divide the total by 12, which is the method now in use throughout the Commonwealth of Australia. Each quarterly mean is arrived at by adding together the number of the population at the beginning and at the end of the quarter and dividing the sum so obtained by two.

VI.—METEOROLOGY.

79.—NOTES ON THE CLIMATE OF WESTERN AUSTRALIA FOR YEAR ENDED 31st DECEMBER, 1913.

(By the Commonwealth Meteorological Divisional Officer for Western Australia.)

In Western Australia seasons are clearly defined, both as regards temperature and rainfall, January corresponding with the English July; thus our *Summer* months would consist of December, January, and February; *Autumn*, March, April, and May; *Winter*: June, July, and August; and *Spring*: September, October, and November; January being our mid-summer, and July our mid-winter; whilst March would commence Autumn, and September our Spring.

The annexed table shows the mean temperature, evaporation, and rainfall for several years at Perth for each of the seasons:—The temperature records extend over 17 years; the evaporation 15, and the rainfall 38 years.

* Owing to the Commonwealth Government having discontinued the distinction between the State production and that of the other States of the Commonwealth, it is now impossible to show the oversea destination of locally produced exports in this table, as shown previous to the year 1911. In the case of the Interstate Transfers, however, the value of local produce exported to each State of the Commonwealth is shown in the Summary of Table No. 13, page 226.

† Product of Australia, originally exported abroad and now returned.

PART IV.—INTERCHANGE.

No. 10.—*GENERAL IMPORTS into the State of Western Australia from places outside the Commonwealth during the Year 1913.*

Duties on British and Foreign Imports are collected under the provisions of the Commonwealth "Customs Tariff Act, 1902." (Edwd. VII., No. 14).

NOTE A.—On all British and Foreign Imports 10 per cent. has been added to the fair market value of the goods at port of shipment.

NOTE B.—The "Quantities" columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

(Compiled from Returns furnished by the Collector of Customs.)

No. 11—*INTERSTATE TRANSFERS into the State of Western Australia during the year 1913, showing in each case the State from whence imported.*

NOTE A.—On all Imports 10 per cent. has been added to the fair market value of the goods at port of shipment to cover cost, insurance, and freight.
NOTE B.—The " Quantities " columns are left blank in all cases where the quantities declared are packages of an irregular or unrecognised size, and consequently do not indicate the number, capacity, or weight of articles imported.

Compiled under the authority of "The Statistics Act, 1907."

No 5.—*Number of Holdings from which Returns were received for the Season 1913-1914, arranged in Acreage Series, and Total Area in acres, distinguishing Statistical Districts, Sub-Districts, and Areas of Western Australia.*

NOTES.—1. *The rectangular areas* adopted, which are shown on the map attached to this part of the *Statistical Register*, are comprised within the sheet lines of the Standard Plans of the Survey Department. Being permanently fixed they are units that can be readily sub-divided and re-grouped at any future time into new districts and sub-districts, without impairing their use for comparative purposes. Except where the areas are broken by the sea coast or other causes, the area numbers here printed in black type represent areas of 8,437½ square miles each, whilst those printed in ordinary type represent areas of 937½ square miles each, and the sub-area numbers marked A, B, C, or D, as the case may be, represent areas of 234⅜ square miles each. 2. Areas in parentheses and marked with an asterisk (*), are those for which the returns, if any, have been included in those of an adjacent area where the homestead is situated. In most instances, however, they are unoccupied as regards the headings shown. Areas marked (†) are portions of areas only.

(‡) The reason why Returns relative to certain alienated and leased land are not obtained under the Statistics Act is mainly to be found in the fact that it has proved impracticable for the Statistical Collectors to enforce the provisions of the Act in connection with lands which remain *entirely unimproved or unstocked*, and also in a lesser degree in the fact that small holdings under one acre in extent are exempted from supplying Returns. The Statistical returns are, however, collected from all lands over one acre in extent on which improvements have been effected, and upon which Agricultural or Pastoral pursuits are carried on, and, therefore, comprise all lands the obtaining of Returns from which would serve any practical purpose.

* The acreages under "Vineyards" and "Orchards" have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard suggested by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre. † Corrected figures from previous issue. Area under "Small Fruits," transferred to "Orchards."

---

* If importation took place during the year it was classified under some general heading, and not particularly specified. † It is possible that for this and subsequent years certain importations of currants and raisins have been returned as other Dried Fruit, thus accounting for the apparent decrease under the two former headings, and the increase under the latter. ‡ Including other essential oils. § Principally for breeding purposes.

NOTE.—This table has been compiled with the special object of showing the values of the importations into Western Australia during the last 10 years of such products of the soil and of live stock as might in the future be produced within the State, but are at present introduced to supply the deficiency in local production. It serves, in some respects, as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

PART VII.—MINERAL STATISTICS AND WATER CONSERVATION.

No. 14.—*Return of Ores and Minerals (other than Gold) produced in Western Australia, also number of men employed in their extraction, as reported to the Mines Department during 1913 and previous years.*

NOTE.—As the collection of statistics of minerals, other than gold, was only commenced by the Mines Department in 1899, the mineral production previous to that year has been taken from the Customs Records. *See* Table 15.

II.—WATER CONSERVATION.

No. 24.—*Principal Works under control of the Goldfields Water Supply Scheme to 31st December, 1913.*

(Tables Nos. 24 to 29 inclusive supplied by Water Supply, Sewerage, and Drainage Department.)

Source of Supply and outline of Headworks.	Main Works, Description.	Towns and Districts Supplied.				
		Name of Town or District.	Supply Main.	Length of Distributing and Reticulation Mains. Miles.	Service Reservoirs.	Remarks.
Source of supply is the Helena River, Darling Ranges, where at about 18 miles in a direct line from Perth, an impounding reservoir having a capacity of 4,600,000,000 gallons has been formed by the constructio of a straight line concrete overflow weir. Height of wall from bed of river is 100 feet. Height of wall from lowest part of foundations is 190 feet. Length of wall is 755 feet. Height of crest of wall above zero on Fremantle Tide Gauge is 420·16 feet. Catchment area is 364,000 acres. Annual rainfall recorded on the Catchment varies from an average of 40·50 inches in the vicinity of the Reservoir to 17·55 inches near the source of the river.	Helena Reservoir Other Reservoirs Pumping machinery, including buildings, tanks, sidings, etc. Main conduit is of Locking-Bar Steel Pipe of 30 inches internal diameter, 351½ miles long. The water is forced through this main to a net height of 1,290 feet in steps by a series of eight pumping installations placed at intervals along the line of conduit. No. 1 being at the Reservoir. No. 25.—*Principal Works under the control of the Metropolitan Water Supply, Sewerage, and Drainage Department for the Supply of Water to the Metropolis to 31st December, 1913.*

Source of Supply and outline of Head-works.	Main Works, Description.	Towns and Districts supplied.		
		Name of Town or District.	Supply Mains.	Remarks.
The main sources of supply of water to the Metropolitan Area are—(1.) The Victoria Reservoir which is formed by a dam across Mundy's Brook and a small pipe head dam across a permanent stream known as Bickley Brook, which is really a tributary of Mundy's Brook. The Victoria Reservoir has a capacity of 211,000,000 gallons. The height of the wall from the bed of the Brook is 52ft., the wall being constructed of concrete and being of the type known as an arched dam. The height of the top water level of the reservoir is 608·52ft. above the tide gauge at Fremantle, and the catchment area is 10,000 acres. The average rainfall on the catchment area for the past 17 years is 36·55 inches. (2.) In addition to the supplies from Mundy's and Bickley Brooks, a small portion of the water is obtained from the Helena Reservoir, generally known as Mundaring Weir. This water is used to supply what is known as the Guildford District of the Metropolitan Area, and the supply is practically exhausted in this area. (3.) The supply is augmented by bores in different portions of the Metropolitan Area, there being three bores at Leederville, one at Subiaco, two at Claremont, and two at Fremantle. The bores at Leederville have a capacity of 5,000,000 gallons, those at Claremont 1,000,000 gallons, at Fremantle 1,630,000 gallons, and the one at Subiaco 300,000 gallons, the total supply of bore water available being 7,830,000 gallons per day.	In addition to the storage reservoirs mentioned, there is a storage reservoir at Greenmount, where there is a circular reservoir capable of holding one million gallons. At Mt. Eliza, Perth, there are three storage reservoirs which hold 13½ millions. At Claremont there are two storage reservoirs, which hold 850,000 gallons. At Fremantle there are two storage reservoirs, one on what is known as the Signal Station Hill, and the other at Richmond, which holds 1,270,000 gallons. With the exception of one small tank at Claremont, the reservoirs are all constructed of concrete. There are Pumping Stations at Claremont, Leederville, Subiaco and Fremantle for pumping water from the artesian bores to the storage reservoirs. The pumping stations are capable of pumping at a maximum of 6,440,000 gallons per day. * Children under the age of seven years are not criminally responsible; those who have attained that age, but are still under fourteen, are only criminally responsible if it is proved that at the time of the offence they were capable of knowing that they ought to have acted otherwise. In the above table, charges have been included concerning children from seven and over fourteen. Neglected children, formerly dealt with in this table, are now tabulated separately, *see* Tables Nos. 35 and 36. † Age not stated, but cases tabulated under this age as the maximum triable for the offence stated.

* Exclusive of cost of Administration. † Up to and including 1895 the numbers given are those of the "Assisted" or State-aided Denominational Schools. By "The Assisted Schools Abolition Act, 1895," all grants-in-aid to these were abolished from the 31st December of that year. Thereafter these schools ranked as "Private" schools, as distinguished from "Government" schools. The figures for 1896 and onwards include all private schools, secondary as well as primary, though one of the former (the Perth High School) is subsidised by the State. The average attendance, and, consequently, the percentage of attendance to enrolment at these schools from 1896 is partly estimated, some of the returns forwarded being obviously incorrect. ‡ Not ascertained previous to 1897. § Including schools closed during the year. *a* From and including 1897 the percentage of attendance to enrolment has been calculated on the basis of "average attendance" to "average enrolment." *b* Including one undenominational school, particulars of which are not included in next three columns. *c* Year ended 30th June.

NOTES.—*Denominations.*—When two or more Religious Denominations authorise the same Instructor or Instructors to give religious instruction, the children who attend such instruction are entered in the Records and Returns as if each denomination formed a separate and distinct class.

* For convenience sake, the heads of the Methodist, Presbyterian, Congregational, and Baptist Churches have agreed that clergymen belonging to any one of these denominations may be considered as the authorised delegate of the other three. Therefore, the attendance by a clergyman is credited to the denomination whose minister imparts instruction. † Special religious instruction has been given in 343 distinct schools.

B.—GENERAL RELIGIOUS INSTRUCTION.

This instruction, which excludes dogmatic or polemical theology, is given in all schools. The number of childrenwithdrawn from it, in accordance with the written request of parents, amounted to 2,206, made up as follows :—Roman Catholics, 1,899 ; Hebrew,187 ; Seventh Day Adventist, 22 ; No Denomination, 27 ; Church of England, 35 ; Methodist, 12 ; Presbyterian, 5 ; Mohammedan, 2 ; Church of Christ, 3 ; Greek, 4 ; Agnostic, 4 ; Christadelphian, 3 ; Congregational, 1 ; Lutheran, 1 ; Plymouth Brethren, 1.

† Since the beginning of the year 1907 all Music Examinations have been conducted by the combined Universities of Melbourne and Adelaide. Up to 1906, inclusive, the Adelaide University was in partnership with the Associated Board of the Royal College of Music (London). From the 1st January, 1907, the partnership was broken, and a new one was formed with the University of Melbourne. Since this date, the Universities of Tasmania and Queensland have joined the new partnership.

* Up to 6th April, 1903, the Society was known as "The Mueller Botanic Society." On this date the scope of work embraced was widened to include all branches of Natural History, and the title was changed to "The West Australian Natural History Society." In 1909 the title was changed to "The Natural History and Science Society of Western Australia," and it is now open to all branches of scientific research. In 1914 His Majesty the King graciously permitted the Society to assume the title of "The Royal Society of Western Australia." Meetings of members are held monthly in the Society's Rooms at the West Australian Chambers, Perth, when papers are read on the different subjects embraced in the Society's curriculum. Frequent Field Excursions are made during the season.

*Prior to 1885, readings were not taken at 9 a.m. and 3 p.m., and the noon reading has been entered as the Monthly Mean· Since that date the mean is taken from the 9 a.m. and 3 p.m. readings. † The Thermometers were moved in August, 1885, to their present position in the Botanic Gardens, and as they have apparently given a slightly lower record since then, the means have been taken from 1886 only.

* Uncontested. † Of the 314 votes which were declared informal by the Returning Officer at the Subiaco Election, 256 were so declared on the ground of an alleged informality, which has subsequently been ruled by the Solicitor General as an insufficient cause for the rejection of the votes as informal. If, therefore, the 256 votes be deducted from the total informal votes for the Subiaco District, and from the number of informal votes recorded for the whole State, the respective percentages would be as follows :—Subiaco 1·47 %, and the whole State 1·13%—the latter under the system of *Compulsory* Preferential Voting, being actually 0·09% lower than the percentage of informal votes recorded at the 1908 General Election under the system of *Optional* Preferential Voting.

* On 31st December. *a* From the first settlement of the colony up to the year 1837 there were no Blue Books issued, and the figures relating to arrivals and departures, shipping, imports and exports were taken either from the reports of the Harbour Master at Fremantle or from the Perth newspapers of that period. From 1838 to 1859, inclusive, the Blue Books give only the excess of arrivals over departures, or *vice versa*. *b* No records obtainable. *c* The figures for 1893 and subsequent years are for the year ended 30th June. *d* Exclusive of figures relating to Unclaimed Depositors' Fund, which for previous years have been included, but including figures relative to the Schools Savings Bank, which provision did not previously exist. *e* Departmental figures.

* Records of Outward Shipping for several years are not available, and for such years, therefore, the same figures are shown as for Inward Shipping. Where, occasionally, the correct Outward figures have been found recorded, they naturally clash with the system adopted for the other years. † Total Gold Export is included in Table No. 3, "Gold Production," pages 6 and 7, which comprises gold received at the Perth Mint. *a* The exports up to the year 1834 consisted only of supplies to shipping, of which no record was kept. *b* No records obtainable.
